ABOUT

I am a Full Stack Developer who builds end-to-end web applications with user-friendly, accessible, and responsive interfaces using React and Next.js, while also developing robust backend systems. Focused on creating exceptional digital experiences from database to user interface. I continuously seek opportunities to learn and contribute to innovative web projects.

WORK EXPERIENCE

Optima Solutions AUG 2025 – Present	Junior Full Stack Developer - Project-Based (Full time) As a Full Stack Developer at Optima Solutions, I build and maintain end-to-end web applications. I design user-friendly, accessible interfaces with React and Next.js while developing robust backend systems to ensure scalability and performance. I work across the full stack to deliver seamless digital experiences from database to user interface. This role was project-based under a full-time contract for a specific client project, focusing on both frontend and backend development
Dreamforge Innovations Inc. JUN 2024 – SEPT 2025	Junior Frontend Software Engineer - Full time As a Frontend Engineer at Dreamforge Innovations Inc., I developed and optimized user interfaces to deliver smooth and engaging digital experiences. I utilized React.js and modern CSS libraries to build intuitive, responsive designs while ensuring seamless API integration. My focus was on performance, usability, and applying best practices to create efficient and user-friendly applications.

EDUCATION

Pamantasan ng Lungsod ng Maynila 2020–2024	Bachelor of Science in Computer Science Relevant courses included Data Structures and Algorithms, Computer Networks, and Software Engineering.
La Consolacion College Manila 2018–2020	Informations and Communications Technology - TVL Strand SHS Relevant courses included Computer Programming, Computer Systems, and Computer Networks.
